

P10 and P27 Relationship Overview

Question	Answer
What is the relationship between the P10 and P27 record sets for 2011?	<p>Beginning with the 2011 Appendix III, the Policy T10 record will be split into multiple records. A landlord/tenant will be identified with the Landlord Tenant Flag on the P10B record and not the Entity Type Code. The Common Land Unit Identifier T27 records are also being split into multiple records and combined with the T17 Land Identifier record. The landlord/tenant is reported on the new P10B and related to the P27 land by the AIP Land Other Person Sharing Key on the P27A record. These changes allow for increased ease in identifying Policy Producer and Land relationships, and providing appropriate reporting.</p> <p>The 2011 record format that splits the information contained on each record into separate entities helps to facilitate the reporting of this policy information.</p>
What has changed for 2011?	<ol style="list-style-type: none"> For 2011 the Policy T10 record has been split into three records: <ol style="list-style-type: none"> Policy Producer P10 Policy Producer Address P10A Policy Producer Other Person Sharing P10B In addition, the Common Land Unit Identifier T27 and Land Identifier T17 records have been combined and split into two parts: <ol style="list-style-type: none"> Land P27 Land Other Person Sharing P27A
Why were these changes made?	<p>These changes were made to allow PASS to more accurately track and report on Policy Producer and Land relationships mainly in relation to the “Other Person Sharing” Land/Producer relationships.</p>
What are the specific changes?	<ol style="list-style-type: none"> In the 2011 Appendix III, the Policy Producer P10 record will be used to collect much of the same information that was collected on the T10 record in previous years. Changes to this include: <ol style="list-style-type: none"> The Relationship Type Code – added to the record in order to identify the Relationship between the Policy Producer and any other insured entity. Values include: <ul style="list-style-type: none"> B = Business, Financial, Legal or Familial C = Insurance Provider Employee D = Relative of Agent or Adjuster E = RMA Employee/FCIC R = Relative of Insurance Provider Employee A = Agency Owner Agent/Adjuster

P10 and P27 Relationship Overview

Question	Answer
	<p>N = None of the Above</p> <ul style="list-style-type: none"> b. The Producer Address information – moved to the P10A record to allow reporting of multiple addresses for the primary producer. c. The Ineligible SBI Share – Moved to the P10B record for use with SBI's who are ineligible d. Record Number and Ineligible SBI Flag – both removed from the P10 record because they are being handled by the P10B record in 2011. The Ineligible SBI Flag on the P10 record was replaced by the Eligibility Code on the P10B record. Since there will be separate records for Primary and Other Entities in 2011, the Record Number field will not be needed. <p>2. The Policy Producer Address P10A record was added to the 2011 Appendix III to allow reporting of multiple addresses for a producer. The P10A record ties back to the P10 record for reporting purposes.</p> <p>3. The Policy Producer Other Person Sharing P10B record was added in 2011 to house the Other Person Sharing details including SBI address information, identity information, and share or interest information in the Policy Producer's land. The P10B record ties back to the P10 record for relationship and reporting purposes.</p> <p>Note: When the Landlord Tenant Flag on the P10B record equals "Y", the AIP Policy Producer Other Person Sharing Key on the P27A record would be populated and the remaining fields on that record would be empty.</p> <p>4. The Land P27 record contains the following fields from the retired Land Identifier T17 record and the reporting of multiple lands on a single record is now handled by submitting multiple records:</p> <ul style="list-style-type: none"> a. Land Identifier b. Land Identifier Type c. Latitude d. Longitude <p>5. The Land P27 record contains all of the same fields it contained in previous years except:</p> <ul style="list-style-type: none"> e. Crop Code f. Insurance Plan Code g. Grid ID h. Type 11 record Number i. Intended Use j. Date Planted k. Irrigation Indicator l. Person's Sharing 1

P10 and P27 Relationship Overview

Question	Answer
	<p>m. Person's Sharing 2</p> <p>n. RMA/FSA difference Flag 1</p> <p>o. RMA/FSA Difference Flag 2</p> <p>p. FSA Administrative State</p> <p>The fields above have been removed from the record because they are being replaced by information contained in a record key field that can be used to point the system to the P11 record containing that information or because that information is no longer relevant or required to process data in the new ITM system.</p> <p>6. The Land Other Person Sharing P27A record is new for 2011. This record was added to the Appendix III to house information about the Land Other Person Sharing relationships. Information contained on this record includes the Key fields necessary to track and identify the land being shared with the producer as well as identifying the Person Sharing and the share in the production.</p> <p>Note: Multiple AIP Land Keys require that multiple AIP Policy Producer Other Person Key and AIP Land Other Person Sharing Key fields be submitted. The ITM system will allow whatever number of records is needed to report this information for each of the multiple AIP Keys.</p>

P10 and P27 Relationship Overview

Question	Answer
<p>How do the relationships between the records work?</p>	<ol style="list-style-type: none"> 1. The P10B is related to the P27A only when there is a landlord/tenant relationship and the land identified on the P27 is the land where the landlord/tenant relationship exists. Otherwise, there is no direct relationship between the two records and no P10B AIP Policy Producer Other Person Sharing Key should be reported on the P27A record. If there is not a landlord/tenant relationship but there is other persons sharing, the P27B would be submitted with the name of the other person sharing and the P10B AIP Policy Producer Other Person Sharing Key would be empty. The landlord/tenant and the other person sharing are mutually exclusive on the record and only one should be submitted on a record. If both the other person sharing and landlord/tenant relationships exist, then two P27A's will need to be submitted. 2. In the case of the P10 and P27 record sets being implemented for 2011, the record key values represented on the P10, P10A, P10B, P27 and P27A records for 2011 will be used to tie the producer relationships to one another and to the land. This new record structure reduces redundancy in data submitted by the AIP's and allows the ITM system to track and monitor information more efficiently while also eliminating the need to have information submitted more than once to tie or link records to each other. This results in an overall reduction in data redundancy required to process and report policy data.
